Student at Howest University of Applied Sciences

EXPERIENCES

www.rockwinkel.be

Mr Package

Web Developer / Shopify Developer / Designer

Developing an engaging webshop using Shopify and custom CSS, while spearheading branding initiatives including logo design and name research. In the realm of data operations, I transform .xls files into precise CSV formats, perform intricate data calculations, and script bulk operations for managing records. Additionally, I specialize in creating and designing advertisement graphics.

www.soswoning.com

SOSWoning

Web Developer / Designer

I have been tasked with developing a website for a company located in Ostend. To expedite the process, I utilized Next.js and the Tailwind CSS framework. While I acknowledge that there were time constraints and the final product may not be perfect, I believe it is still a clean and polished website.

www.rcpswap.com - www.moonsdust.com - www.moonsswap.com

Moonsdust

UX/UI Designer & Developer

Moonsdust, a startup, offered me a developer position through Reddit, which I accepted. During my tenure, I completed various design and coding tasks related to cryptocurrencies, including creating banners, logos, and websites using Figma. I also contributed to the backend for RCPSwap by connecting blockchains. I gained valuable knowledge and skills from this experience that will benefit me in the future.

www.rcryptocurrency.com

r/CryptoCurrency

Web Developer / Designer

As an active member of the r/cryptocurrency subreddit, I have built connections with the mod team and Reddit admins. Recently, the mod team hired me to develop a website that provides information about the subreddit and includes API connections to display current activity data. Although this project is still in development, I plan to incorporate an admin/user role in a MySQL database with a backoffice in future stages.

SKILLS

LANGUAGES

HTML - CSS - Javascript - Java - MySQL - MSSQL - PHP

FRAMEWORKS

Next.js, Tailwind CSS, Bootstrap 5, Laravel

SOFTWARE

Figma, Jetbrain IDEs, Azure Data Studio

EDUCATION

2022 - 2025 | Belgium

Howest University of Applied Sciences

Applied Computer Science - Choice: Software Engineering

2016 - 2022 | Belgium

SJSP Blankenberge

TSO - Informatica & Networks with mathematics
